

This announcement lifts the trading halt as requested by the Company on 10 November 2009.

- **OUTSTANDING GOLD INTERSECTIONS RETURNED AT BLAIR NORTH**
- **OPEN AT DEPTH AND ALONG STRIKE**
- **INITIAL RESOURCE ESTIMATE TO COMMENCE**
- **RC DRILLING COMMENCES AT NORTHERN ZONE**

BLAIR NORTH PROSPECT E25/268, EAST KALGOORLIE PROJECT – WESTERN AUSTRALIA

(Northern Mining Ltd 90%, Balagundi Gold Pty Ltd 10%, right to earn to 24%)

A joint drilling programme between Northern Mining Limited (ASX:NMI) and Southern Gold Limited (ASX:SAU) has revealed outstanding gold intersections at NMI's George's Reward, Blair North (Table 1).

- **Hole BNRC057 66m @ 2.9g/t Au (inc 21m @ 4.5g/t Au, 8m @ 8.8g/t Au, 18m @ 3.4g/t Au, 6m @ 5.4g/t Au)**
- **Hole BNRC010 43m @ 3.4g/t Au (inc historical intersection 25m @ 4.0g/t Au)**
- **Hole BNRC058 45m @ 0.9g/t Au (inc 23m @ 1.2g/t Au)**
- **Hole BNRC059 24m @ 1.6g/t Au**
- **Hole BNRC055 42m @ 2.7g/t Au (historical intersection)**
- **Hole BNRC047 20m @ 1.3g/t Au (historical intersection)**
- **Hole BNRC047 3m @ 2.7g/t Au (new intersection)**

Five reverse circulation (RC) holes were drilled along George's Reward southern tenement boundary in the Southern Zone of E25/268. All drillholes were collared in NMI's tenement E25/268 with the objective of testing the boundary zone straddling the NMI and SAU tenements.

Mineralisation is confirmed from surface to 200 metres below surface and continues south of the tenement boundary. It remains open at depth and along strike (Figure 1).

NMI believes that there are sufficient mineralised drillholes with good to excellent continuity to commence an initial resource estimate for George's Reward.

NMI's Chairman, Mr Alan Lockett commented "these results are exciting and bode well for the future of the Company. Our very supportive shareholder base from both Europe and Australia should be well pleased. RC drilling has commenced at the Northern Zone of Blair North where recent rotary air blast drilling confirmed an extensive gold footprint showing excellent RC gold targets. Results will be announced as they become available".

Northern Mining's holding in the East Kalgoorlie Project recently increased to 90%. Balagundi Gold Pty Ltd may earn a 24% interest in the Project by collectively completing 7,346 metres of reverse circulation (RC) and diamond drilling with Northern Mining Limited before December 2010.

Intersections above are length weighted averages. These intersections are not true thickness. All samples were by fire assay at Kalassay with standards and blanks inserted. All holes gyro surveyed with provisional collar pick-up by hand held GPS on 57, 58 and 59 and surveyed collars on 10, 47 and 55. The drilling programme was planned and executed by Newexco Services Pty Ltd on behalf of NMI and SAU.

Alan Lockett
Executive Chairman

Information in this announcement that relates to Exploration Results is based on information compiled by Adrian Black, Newexco Consulting Geologist, who has sufficient experience relevant to this style of mineralization and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 edition of the Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Adrian Black is a Non-Executive Director of Northern Mining Limited and is a member of the Australian Institute of Geoscientists. He consents to the inclusion in the report of the matters based on the information in the form and context in which it appears. Newexco, through its associated company Skryne Hill Pty Ltd, owns 5.5 million shares and 4.85 million options in Northern Mining Limited. Adrian is also a Director of Balagundi Gold Pty Ltd, Farminor to the East Kalgoorlie Project. Balagundi may earn a 24% interest in the Project by collectively completing 7,346 metres of reverse circulation (RC) and diamond drilling with Northern Mining Limited before December 2010.
